Amendment #2

SECTION II: Scope of Work, Technical Specifications, and Minimum Qualifications for Bidders

is amended as follows:

Technical Specifications:

PV Panels:

“A Panel Efficiency Rating no less than 20.1% measured at standard panel test conditions resulting in a panel Watt Density of no less than 200.5 W/m²”

is amended to read

“The panels output efficiency rating shall be no less than 20.8% Cell efficiency and no less than 18.0% Module efficiency resulting Watt density of no less than 180 W/m².”
