With the Gemini conda channel unavailable, the packages needed to install DRAGONS and Gemini IRAF must be downloaded manually to the local machine. Then, after applying a couple configurations, the installation should proceed in an almost normal way.

The instructions and the data to download are available at the following locations:

MacIntel:

  https://drive.google.com/drive/folders/1GSgcJ-EjA3mFaNNqJT5uAfVP2uAf_FOp?usp=sharing

MacM1/M2:
  https://drive.google.com/drive/folders/1knMNBHuVMlrTVrPzRvCo5hSE1MLDFB5o?usp=sharing

Linux:
  https://drive.google.com/drive/folders/1O-CAOO7b0VH8fmut9iHMun2_e8Pv23p0?usp=sharing

---

Also note that the data packages needed to run the various DRAGONS tutorials are also affected by the systems being down. We have made all the data packages available here:
